

FloShield[®] Air

Active Lens Protection

An all-inclusive solution for maintaining laparoscopic clarity.

FloShield Air delivers continuous defogging during laparoscopic surgery, significantly reducing the need to remove the scope for cleaning.

**Significantly Reduces
Scope Removals**

Continuously Defogs

Pushes Away Smoke & Debris

**Eliminates the Need to Heat
the Laparoscope**

Active Lens Protection

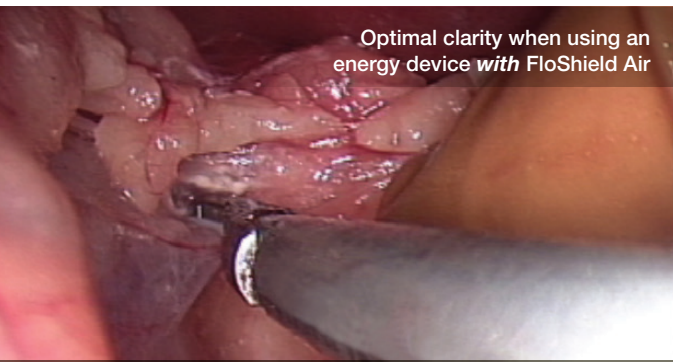

Defogs the Lens In Situ

A continuous flow of dry CO₂ gas over the lens keeps it consistently clear of condensation and fog... *throughout the entire surgery.*

Creates a Protective Barrier

Directing CO₂ down the tip of the laparoscope can help shield the lens from smoke and debris.

FloShield Air significantly reduces the need to remove the laparoscope for cleaning.

FloShield Air Fits

Most 5mm or 10mm scopes
0°, 30°, and 45° angled lens

Providing Enhanced Clinical Benefits that Deliver Better Value than Clarify™
